

## Nighttime Population and Hospital Service Areas City of Atlanta, GA

This map shows the nighttime population and hospital service areas in Atlanta, GA. The data comes from U.S. Census Bureau and ESRI Data & Maps. The map exemplifies the ability to use Thiessen polygons to distribute population density among available hospital service areas. The layout also includes charts that provide further analysis into service area and population break downs that were created using the ArcMap software. This map was created in October, 2017.
