Data downloaded from GEOG 6370 course website: https://uga.view.usg.edu

This map depicts several types of roads, as well as the location of 15 historical sites in Athens Clarke-County. In addition, population density in 2000 according to the National Census is designated by the coloring difference on the map. The map is created to give a general idea of the location of historical sites. The map was created in September and updated in October 2017 using data provided in a GEOG 6370 course.
